CORE COMMANDS
ax points: 10
commands in Linux. You'll access the Ubuntu
Carry out the tasks listed in the table and fill in the corresponding cells with the command you use for each task. Take screenshots of your screen at Steps 4, 9, 10, 11. You can use the Snipping Tool to take screenshots.
Recall that you can use the touch command in Linux to create an empty file: touch data.txt
Also, you can use the cat command to view the contents of the file: cat file.txt
Step # | Task | Command
1 | Check your present working directory
2 | Create a directory with your name
3 | Create a directory with your last name
4 | List the contents of your current folder
